Schedule for Computer Systems Modelling

Michaelmas Term 2026

- There are three topics in the course: Simulation (S), Queueing theory (Q), and Control theory (C), which correspond to a section of the course notes with hyperlinked videos.
- There is one *optional but recommended* programming assignment

Date	Readings (on Perusall.com "Course notes" folder)	Exercises
-	Introduction (watch on your own)	-
Oct 8	Simulation notes: slides 1-22	Simulation Exercises 1-3
Oct 13	Simulation notes: slides 23-38	Simulation Exercises 4-6
Oct 15	Introduction; 6.1 - 6.2.1	Section 6.9: Exercises 1-3
Oct 20	6.2.2 – 6.2.8	Section 6.9: Exercises 4-10
Oct 22	6.2.9 - 6.3	Section 6.9: Exercises 11-12
Oct 27	6.4	Section 6.9: Exercises 13-15
Oct 29	6.5	Section 6.9: Exercises 16-17
Nov 3	6.6-6.7.1	Section 6.9: Exercises 18-20
Nov 5	6.7.2 – 6.7.3, the M/G/1 queue, open and closed systems	Queueing Theory: Exercises 1-3
Nov 10	5.1-5.2 up to 5.2.1	Section 5.12: Exercises 1-4
Nov 12	5.2.1-5.4	Section 5.12: Exercises 5-10
Nov 17	5.5-5.7	Section 5.12: Exercises 11-15
Nov 19	5.8, 8.1	Section 5.12: Exercises 16-18 Section 8.13: Exercises 1
Nov 24	8.2	Section 8.13: Exercises 2-4
Nov 26	8.3-8.4	Section 8.13: Exercises 5-6
Dec 1	8.5-8.6, 8.8, MPC	Section 8.13: Exercises 7-9
